personal health optimiser®

What is personal health optimiser®?

Developed here in Australia, **personal health optimiser®** harnesses the experience and expertise of registered healthcare professionals, including a Dietitian, a Doctor and a Pharmacist.

This innovative service features an integrated package of “tools” which work together, helping you to monitor and *improve* your quality of life. This gives you the ability to take a truly personalised, *pro-active* approach to your own *preventive healthcare* that can help you to stay healthy and live longer.

How does personal health optimiser® work?

On a quarterly basis, you'll complete two brief questionnaires and monitor key aspects of your health, which you input on-line to our secure website.

You'll receive ongoing feedback on your health, along with recommendations regarding preventive health measures, so you can take whatever action may be suggested. All of our reports feature simple, yet effective, diagrams and charts which present your information clearly, so it's easy to understand.

Examples of the reports you'll receive, covering *Analysis*, *Quality of Life* and *Activity*.

Intrigued? How do you find out more?

For more information about **personal health optimiser®** please visit our website

www.healthoptimiser.com.au

You'll find an interesting and informative on-line demonstration, along with full details of how to apply.

At around \$80 per year for the subscription to this service, taking this step could be one of the best investments you'll ever make – helping you to stay healthy and live longer.
